kanga  
project

## We support the agents of change in Tanzania Women & Girls

training day in chicken rearing

**Teach a man to fish** and he'll feed his family.

**Teach a woman to fish** and she'll feed her family, send her kids to school, build a well, set up a cooperative, demand a hospital, take control of her fertility, give her children a good start and pull the whole community up with her.

seminar in family planning

improving skills & knowledge

### We provide education in

- self-awareness & empowerment
- capacity building
- entrepreneurship
- health, hygiene and HIV/AIDS
- civil rights, etc.

volunteer support is welcome

### To help the next generations hit the floor running

- We arrange sponsorships for a secondary education
- We build hostels near schools and stop excuses dead in their tracks.

### OUR WISH IS TO BECOME OBSOLETE

We are working in the Ilongero Ward of Singida in Tanzania and are "building up" a community of over 12,000 people through their women and girls. We hope to be made redundant when every secondary school has a hostel and when our latest project of a self sustaining training centre for everyone is built. **We really could do with your help.**
